Post Job Steps

- [ ] Recheck all fluid levels, verify all drain and level plugs are tight
- [ ] Make sure every closure, access panel, cover, and door is properly closed and locked
- [ ] Clean work area of debris, old parts, excess / unused materials and lubricants, roll up hoses and cords, return chemicals to flammable cabinet, etc
- [ ] Return equipment worked on or inspected to a safe operating condition
- [ ] Ensure any follow up work orders are submitted to planning for all found corrective issues to be resolved later
- [ ] Walk around equipment to ensure that all foreign materials are cleaned up & put away properly. (rags, tools, blocks, chains, parts, garbage)
- [ ] Complete parts & core returns
- [ ] Clean up old filters / oils and dispose of properly

Timesheet

Technician	Date	Start	Finish	T/TS/R

Note: T = Travel, TS = Troubleshoot, R = Repair
Please ensure time is separated for each instance. This is to track travel time in addition to troubleshooting time and repair time.
